

Assignment #:	2
Description:	EER Model
Students:	Simon Jakobsson Gustav Hanstorp
Gitlab URL:	<a href="https://gitlab.liu.se/simja649/db">https://gitlab.liu.se/simja649/db</a>

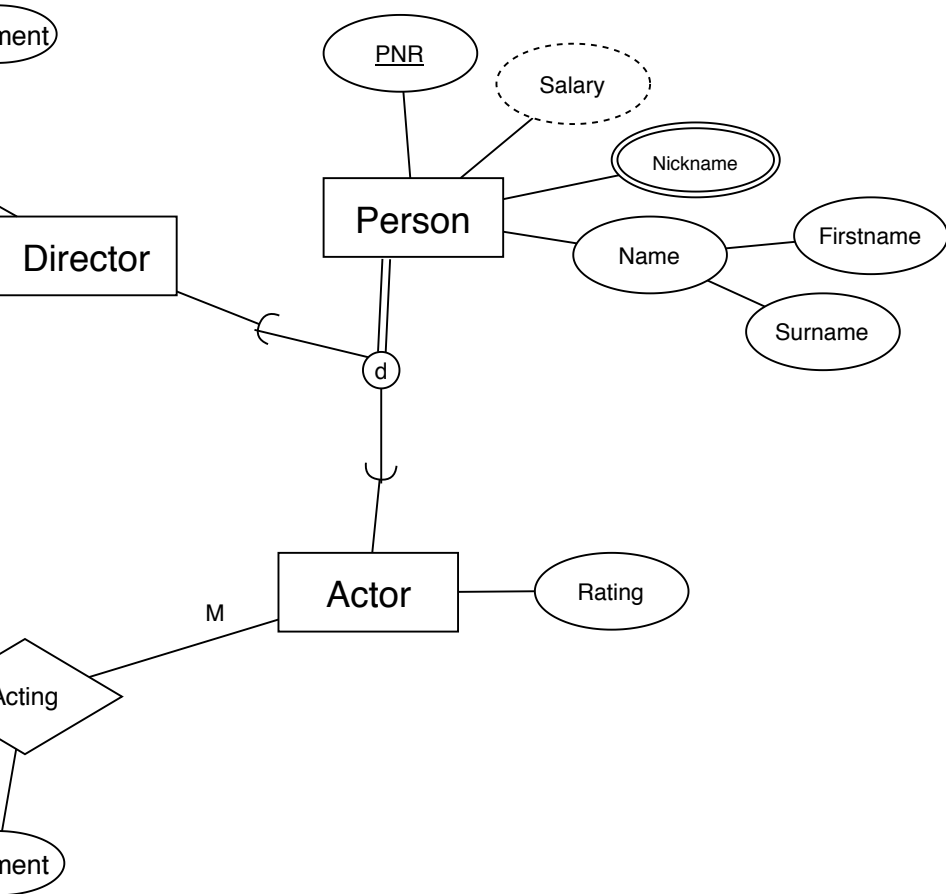

Assumptions:

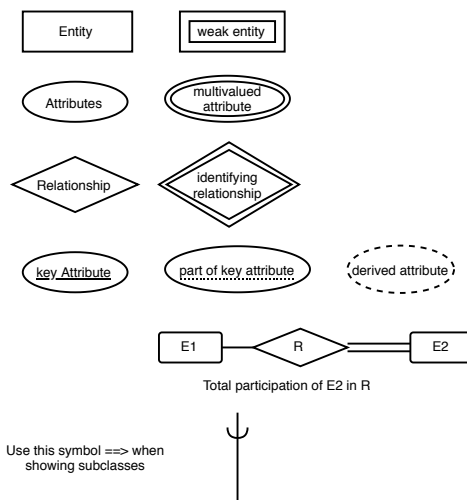

1. A person can only be either actor or director
2. Because a person gets payed, they need a salary
3. In a series there can be zero actors (even how boring that sounds)
4. For a episode to exist there must be a director
5. A TV-series does not need an episode while an episode needs one and only one TV-series.

Note:

1. The...
2. Fi...
3. Fi...
4. Ke...
5. Sa...
6. To...

This template contains two pages (EER Model, Relational Model, see the bottom of the editor window).  
 At each diagram on one page, preserve the page size.  
 Fill out the header at the top left corner on both pages.  
 Keep the diagrams clean, i.e. shapes and lines should not overlap, maintain optimal distance between the objects, etc.  
 Have a working copy as an XML .drawio file to be able to correct the diagrams in the future.  
 To submit the diagrams, they must be exported and uploaded to Gitlab as a PDF file (File->Export as->PDF->All pages).

Fill in cardinalities by placing a text block and labeling it 1, N or M
